

**NEW**

# K E Y S T O N E **KAPSTONES**

## *Keystone KapStones™ Provide the Finishing Touch!*

Keystone Kapstones™ are column caps that have the natural beauty and durability of cut or rough hewn stone, but without the heavy weight or the high cost of true or cultured stone.

*All exposed edges have the characteristics of real stone, with ridges, clefting, and the rough textures of granite, limestone, or flagstone. The cap fits over a variety of Keystone products, actually hiding the joining with a recessed ledge. The 24"x24" Keystone KapStone will fit with the 20"x20" Country Manor System as well as the 20"x20" Stacker column made using the 8" main Stacker unit and the Stacker 90 degree corner unit. Contact your Keystone Regional Manager for further information on pricing and scheduled product availability.*

*Keystone Kapstones are available in three different stone-like color options including: White Granite, Tan Sandstone and Grey Limestone.*
